MYASSISTANT FOR TIMBERLINE OFFICE AWARDED TOP PRODUCT

MyAssistant selected as top product for commercial construction

Tigard, OR – February 26, 2009 – Innovative Software Design's MyAssistant product received a Top Product award in Constructech's Top Products of 2009 in the commercial construction marketplace. "We are pleased with this selection," said Dennis Earnshaw, President of Innovative Software Design. "In today's challenging economy contractors are finding ways to do more with less. With MyAssistant's ability to monitor Sage Timberline Office and proactively respond as needed, many of the time consuming processes contractors deal with are completely automated."

The Constructech Top Product awards honor technology solutions geared toward the commercial construction market. Winning products are selected based on their innovation, the benefits they deliver, their overall usefulness, uniqueness to the construction industry, and customer growth rate for the product over the past few years.

"Being named one of the Constructech Top Products is a testament of the dedication and innovative approach held by the technology providers serving the construction space. These products are among the best technology currently available for commercial construction applications," said Mike Carrozzo, chief editor of Constructech.
