MYASSISTANT FOR TIMBERLINE OFFICE AWARDED TOP PRODUCT

MyAssistant selected as top product for residential construction

Tigard, OR – February 2, 2009 – Innovative Software Design's MyAssistant product received a Top Product award in Constructech's Top Products of 2009 for residential contractors. "We are pleased with this selection," said Dennis Earnshaw, President of Innovative Software Design. "In today's challenging economy builders need to find ways to do more with less. With MyAssistant's ability to monitor Sage Timberline Office and proactively respond as needed, many of the time consuming processes builders deal with are completely automated, making them more productive."

The Constructech Top Product awards honor technology solutions geared toward the homebuilding market. Winning products are selected based on their innovation, the benefits they deliver, their overall usefulness, uniqueness to the construction industry, and customer growth rate for the product over the past few years.

"Being named one of the Constructech Top Products is a testament of the dedication and innovative approach held by the technology providers serving the construction space. These companies work to provide builders with the solutions they need in order to be efficient and competitive in today's economy," said Mike Carrozzo, chief editor of Constructech.
